Globe Valves

Soft-seated Globe Valves

BOA-SuperCompact

Flow characteristics

The characteristic curves are based on water with a temperature of 5 to 30 °C. The flow velocity (v) in the valve passage (DN) should not exceed 4 m/s. Due to the elastic closing process on soft-seated globe valves we recommend to set the number of stem turns starting from the OPEN position.

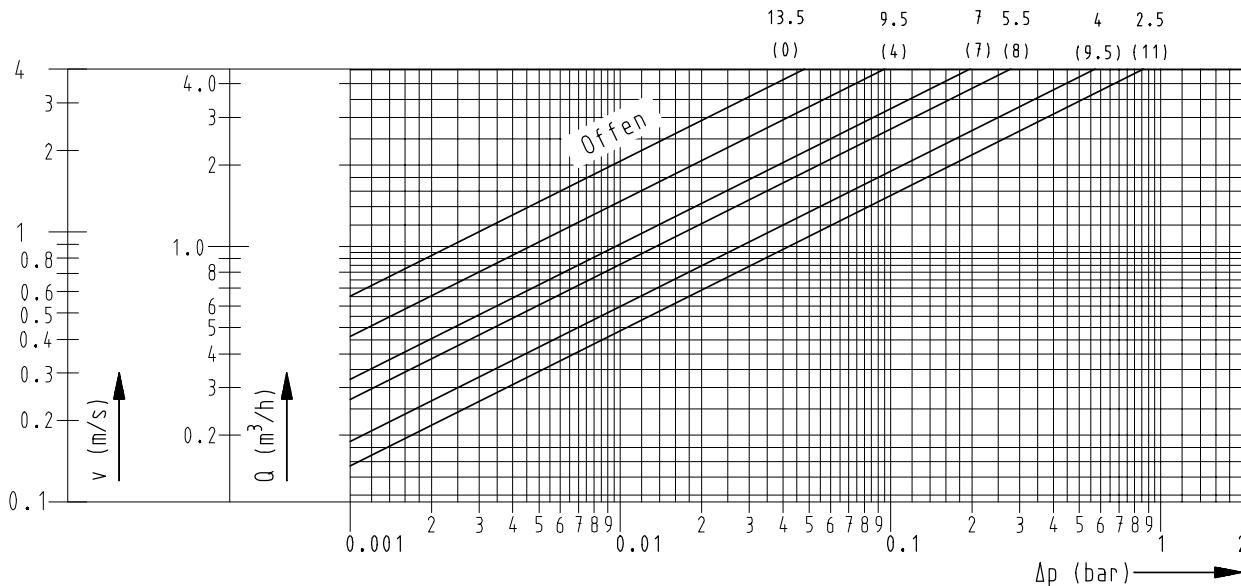

Description of units

Unit	Description
Q	Volume flow rate in m ³ /h
V	Flow velocity in m/s
